Notes:

This melody is actually a lot easier than it looks on the page. I would urge you to get a recording of the original guitar concerto to get the basic tune in your head. You may also hear my version on [THIS](#) site on my "Serenade" CD demo page. If you subdivide the rhythms and beat the 8th note, your rhythm will be much more accurate. This is the exact variation that I used for the recording of this song back in September of 2005.
